Understanding Benefits, Balances, Referrals, and Notes

Network Health · Case Manager Reference

Status

Select the Status field on a referral to see what it means. **Accepted By Provider** means the provider has confirmed — and that's your green light to share their contact info with the member.

Provider

Select the provider's name for their contact card — Provider ID, company, name, email, phone, and location.

SHARING PROVIDER CONTACT INFO

The phone number is visible regardless of status — but only share it with the member once the referral reaches **Accepted By Provider**.

Referral narrative

Free-text space for context added to the referral — special instructions, background for the provider. It's normal for this to come back empty; check it anyway, since you won't know until you look.

Balance & key dates

Above the encounter list: Allowed, Used, and Remaining hours for this specific referral (each completed encounter’s hours count toward Used; 1 point = 1 hour) — a different view than the benefit-level totals on the member's landing page. Below that, Key Dates tracks the referral's history: received, assigned, accepted, and (if applicable) declined.

Encounters

An encounter is the provider's record of what actually happened, including completed Service Tasks. Encounters only appear after a provider has actioned the referral, so a brand-new referral may not show one yet.

TASK CHECKLISTS VARY BY SERVICE

For Homemaking, the provider checks off the tasks done on each visit: Companionship, House Help, Technology Education & Support, Physical Activity, Grocery Shopping/Drop, or Other. Other services show their own checklists.

Add a note

1. Select **Add**, then **Add Note**.
2. Choose a Note Type (Visit Scheduled, Member Outreach, Status Change, General, and more).
3. Type what happened, then select **Add Note** to save it.

NOTES DON'T ESCALATE ANYTHING

Adding a note does not alert The Helper Bees — it's just a record on the referral. If something needs attention, submit a ticket instead.

Find notes, documents, and service questions

VIEW MENU OPTION	WHAT IT SHOWS
View Notes	Every note logged on the referral, in one table
View Documents	Any files a provider has attached (receipts, invoices)
View SDQ	The answers to the Service Questions entered when the referral was created — for example a ride's pick up location and the member's mobile number. Homemaking has no Service Questions, so its SDQ panel is empty.

The Non-Emergency Transportation tile

The second benefit, Non-Emergency Transportation, has its own authorization and its own referrals. Each ride is one point, the quantity is limited to 1 per ride order, and the annual reimbursement maximum is set by the plan: **$400 (Select PPO)** or **$750 (Go PPO)**. Allowances expire at the end of the year and don't roll over.

ABOUT THE 9999.00 ALLOWANCE

The Transportation tile shows 9999.00 by design. The plan controls the annual reimbursement ($400 Select PPO, $750 Go PPO), so you enter the rides the member needs.
