Understanding Benefits, Balances, Referrals, and Notes

Simpra · Case Manager Reference

Status

Select the Status field on a referral to see what it means. **Accepted By Provider** means the provider has confirmed — your green light to share their contact info with the member.

STATUS	MEANING
New	Referral created and awaiting approval
Approved	Recognized by the system but not yet assigned to a local provider
Assigned to Provider	A provider in the service area was alerted (they have 3 days to respond)
Accepted By Provider	Provider accepted — contact info can be shared with the member
Unable to Contact	Provider couldn't reach the member after 3 attempts
Member Declined Services	Member declined the provider that reached out
Completed	All rate types invoiced and billed
Closed	Service refunded; referral inactive

Provider

Select the provider's name for their contact card. The phone number is visible regardless of status — but only share it with the member once the referral reaches Accepted By Provider. Providers should reach out within 3–5 business days; if the member hasn't heard from anyone after 7–10 business days, they should call The Helper Bees.

Referral narrative

Free-text context a case manager has added — special instructions or background for the provider. It's normal for this to be empty; check it anyway.

Balance & key dates

Above the encounter list: Allowed, Used, and Remaining **visits** (points) for this specific referral — a different number than the benefit-level totals on the member's landing page. Key Dates tracks received, assigned, accepted, and (if applicable) declined. **Source** shows how the referral came in (for example eFax, Portal, or Phone, or N/A) and any of those is expected.

Encounters

An encounter is the provider's record of what actually happened, including confirmed Service Tasks. Encounters only appear after a provider has actioned the referral.

Add a note

1. Select **Add**, then **Add Note**.
2. Choose a Note Type (Visit Scheduled, Member Outreach, Status Change, General, and more).
3. Type what happened, then select **Add Note** to save it.

NOTES DON'T ESCALATE ANYTHING

Adding a note does not alert The Helper Bees — it's just a record on the referral. If something needs attention, submit a support ticket instead.

Find notes, documents, and service questions

VIEW MENU OPTION	WHAT IT SHOWS
View Notes	Every note logged on the referral, in one table
View Documents	Any files a provider has attached (receipts, invoices)
View SDQ	The Service Questions answered when the referral was created — preferred dates and times, facility details
