Adding a Referral

Ultimate · Case Manager Reference

BEFORE YOU START

Members have **30 hours of Companion Care per year**, and unused hours don't roll over to the next year. The service is **30 points per unit**, so **one unit is the full benefit** — you always check out with a Quantity of **1**.

Create the referral

1. From the member's benefit page, select **Add Referral**.
2. Choose Service Category: **In Home Support**.
3. Search for and select the service: **Companion Care**.
4. Confirm the service is **Active**.
5. Enter a **Quantity** of **1** — one unit equals the member's full 30-hour benefit (30 points). The quantity can't go higher than 1.
6. Select **Add to Cart**.
7. Select the cart icon, then the member's name, to open the **Referrals Summary** and confirm the quantity is 1 and the total is 30.00 points.

Review and submit

1. Confirm the **Service Address** — use *change service address* if care happens somewhere other than the member's home address.
2. Select **Checkout**, then **Confirm**.

VERIFY THE SERVICE ADDRESS BEFORE YOU CHECK OUT

An incorrect address can't be edited after checkout — it takes a support ticket to close the referral, and you'll have to create a brand-new one. Double-check it every time before you confirm.

WHAT COMPANION CARE COVERS

Social engagement, light housekeeping, light meal preparation, laundry, and pet-help tasks. It does not include yardwork, pet walking, transportation, errands, grocery or prescription pickup, or hands-on bathing and personal care.

AFTER SUBMITTING

The referral may not show an encounter right away — encounters only appear once the provider has completed a visit. That's expected, not an error.
