Quick Tips to Check Before Submitting a Ticket

Ultimate · Case Manager Reference

Most “something looks wrong” moments are expected behavior. Run through this table before you escalate anything.

SITUATION	WHAT TO CHECK
No referral present	Confirm the correct member ID and benefit tile. Not every member has a referral yet.
Care location differs from the member's address	Confirm the service address; use change service address when available.
Quantity or points look wrong	Companion Care is 30 points per unit, so the Quantity should be 1 and the total 30.00 points. Don't enter hours as the quantity.
Hours look wrong	Compare the authorization's Plan Allowance, Used, Pending, and Remaining with the referral's Encounter Summary (Allowed, Used, and Remaining hours for that referral).
No encounter is visible	Encounters appear only after the provider has completed a visit.
Member hasn't heard from the provider	After a provider accepts, they should contact the member within 3–5 business days. Members are asked to call The Helper Bees if they haven't heard after 7–10 business days.
Member asks for something outside Companion Care	Yardwork, pet walking, transportation, errands, grocery or prescription pickup, and hands-on bathing or personal care aren't covered.

Still need to submit a ticket?

1. Open the form from within Benefits Hub, or go directly to **uhp-thb.zendesk.com/hc/en-us/requests/new**.
2. Fill in every field marked with an asterisk. If a field doesn't apply, enter **N/A** — don't leave it blank.
3. Choose the **Issue Type** that fits (see below).
4. In **Additional Comments**, include the member's name, member ID, and referral details so support has what they need.

Choosing an Issue Type

ISSUE TYPE	USE FOR
I need help logging in	Sign-in or account access trouble
I have a question about my order/service/referral	Referral status, service questions — the most common choice
Need a refund	Billing or refund requests
Account creation/deletion	Setting up or removing an account
Provider: change request/report a provider issue	Provider changes or conduct concerns
Report system issue/outage	Benefits Hub itself is down or broken
