Ultimate Case Manager FAQ

Common questions from the field

What does the Ultimate companionship benefit include?

Eligible members get up to **30 hours per year** of Companion Care through In-Home Support Services (Companionship): social engagement, light housekeeping, light meal preparation, laundry, pet-help tasks, and related companionship activities.

What is *not* covered?

Providers can't do yardwork, pet walking, transportation, errands, grocery or prescription pickup and drop-off, or hands-on bathing and personal care.

Do unused hours roll over?

No. The 30 hours run on the calendar year and expire at year-end.

How do I see how many hours a member has left?

Look at **Remaining** on the authorization under the benefit tile for the member's overall balance. To see one referral's hours, open the referral and check its Encounter Summary — it shows Allowed, Used, and Remaining hours.

Can I share the provider's phone number with a member?

Yes — once the referral reaches **Accepted By Provider**. Before that point, the details may be visible in Benefits Hub but aren't ready to hand out yet.

A member says the provider hasn't called. What now?

After a provider accepts, they should contact the member within 3–5 business days. If the member still hasn't heard after 7–10 business days, they should call The Helper Bees. You can also check the referral's status and notes, and submit a support ticket if it looks stalled.

Why don't I see an encounter on a brand-new referral?

Encounters only appear after the provider has completed a visit. A referral with no encounters yet isn't necessarily a problem.

I'm searching by ID and getting no results. Now what?

Ultimate member IDs start with UL followed by seven digits — double-check the format. If it still doesn't work, use Advanced Search with First Name, Last Name, and Date of Birth.

A member should be eligible but I don't see a benefit tile.

Eligibility comes from the plan, and The Helper Bees creates the authorization. Confirm you have the right member first; if the tile is still missing, submit a support ticket with the member's name, ID, and date of birth.

What quantity do I enter when I create a referral?

Always **1**. Companion Care is 30 points per unit, and one unit is the member's full 30-hour annual benefit, so the Total Points shows 30.00. The quantity can't go higher than 1.

Does Companion Care have Service Detail Questions?

No. Ultimate referrals don't ask any extra questions when they're created, so View SDQ will be empty.

Where do I go for escalations?

Use the one Submit a Request form at uhp-thb.zendesk.com. Choose the Issue Type that best fits and include full details in Additional Comments.

What if a required ticket field doesn't apply?

Enter N/A rather than leaving it blank. Every field marked with an asterisk is required, and an empty required field can stall the ticket.
