

Adding a Referral

Alignment · Case Manager Reference

BEFORE YOU START

Each member has an **annual limit of cleanings** set by their plan (1-21), and **1 point = 1 cleaning**. Members can use Light Housecleaning, Standard Housecleaning, or a mix within that limit. **Use the full allotment at checkout — all annual visits belong in one referral/order. Don't create one-off referrals.**

Create the referral

- 1 From the member's benefit page, select **Add Referral**.
- 2 Search for and select the service: **Standard Housecleaning - Copay** or **Light Housecleaning - Copay**.
- 3 Confirm the service is **Active**.
- 4 Alignment has no Service Detail Questions (SDQs), so there is nothing extra to fill out.
- 5 Enter the **Quantity** — the member's full intended cleanings for this service.
- 6 Select **Add to Cart**.

USING BOTH SERVICES?

Add and review each service separately, then make sure the combined total matches the member's annual limit before you check out.

Worked example

SERVICE	QUANTITY	POINTS EACH	TOTAL POINTS
Standard Housecleaning - Copay	7	1.00	7.00
Light Housecleaning - Copay	3	1.00	3.00
Total	10		10.00

Review and submit

- 1 On the Referrals Summary screen, review each service's quantity and total.
- 2 Confirm the **Service Address** — use Change Service Address if care happens somewhere other than the member's address on file.
- 3 Check that the combined total matches the member's full annual limit — no partial or one-off referrals.
- 4 Select **Checkout**, then **Confirm**.

VERIFY THE SERVICE ADDRESS BEFORE YOU CHECK OUT

An incorrect address can't be edited after checkout — it takes a support ticket, and you'll need to create a new referral. Double-check it every time.

GOOD TO KNOW

Providers can complete only **one cleaning per day**, so visits can't be stacked. Where a member's plan includes a copay, they pay **\$50 per cleaning directly to the provider** — that isn't handled in Benefits Hub.
