

Understanding Benefits, Balances, Referrals, and Notes

Alignment · Case Manager Reference

Status

Select the Status field on a referral to see what it means. **Accepted By Provider** means the provider has confirmed — and that's your green light to share their contact info with the member.

STATUS	MEANING
New	Referral created and awaiting approval
Approved	Recognized by the system but not yet assigned to a local provider
Assigned to Provider	A provider in the service area was alerted (they have 3 days to respond)
Accepted By Provider	Provider accepted — contact info can be shared with the member
Unable to Contact	Provider couldn't reach the member after 3 attempts
Member Declined Services	Member declined the provider that reached out
Completed	All rate types invoiced and billed
Closed	Service refunded; referral inactive

Provider

Select the provider's name for their contact card. The phone number is visible regardless of status — but only share it with the member once the referral reaches Accepted By Provider. Providers should reach out within **3-5 business days**; if the member hasn't heard from anyone after **7-10 business days**, they should call The Helper Bees.

Referral narrative

Free-text context a case manager has added — special instructions or background for the provider. It's normal for this to be empty; check it anyway.

Balance & key dates

Above the encounter list: **Allowed, Used, and Remaining** cleanings (points) for this specific referral — a different number than the benefit-level totals on the member's landing page. **Key Dates** tracks received, assigned, accepted, and (if applicable) declined.

Encounters

An encounter is the provider's record of what actually happened, including confirmed Service Tasks. Encounters only appear after a provider has actioned the referral.

Add a note

- 1 Select **Add**, then **Add Note**.
- 2 Choose a Note Type (Visit Scheduled, Member Outreach, Status Change, General, and more).
- 3 Type what happened, then select **Add Note** to save it.

NOTES DON'T ESCALATE ANYTHING

Adding a note does not alert The Helper Bees — it's just a record on the referral. If something needs attention, submit a support ticket instead.

Find notes, documents, and service questions

VIEW MENU OPTION	WHAT IT SHOWS
View Notes	Every note logged on the referral, in one table
View Documents	Any files a provider has attached (receipts, invoices)
View SDQ	Service Detail Questions. Alignment has none, so this will be empty — that's expected
