Finding Your Member

Quick reference for searching and reviewing a member: Aetna case managers

1 Search for your member

- Search by **member number** for the fastest results. Aetna member numbers are 12 digits.
- No member number handy? Use **Advanced Search** and enter first name, last name, and date of birth. All three fields are required. Case managers can't search by just one or two of them.

2 The member landing page

- The **Overview** panel holds the member's key details: full name, date of birth, address, phone, email, and preferred language. Check here first.
- You can **add or correct the member's email** with the pencil next to it.
- **Recent Activity**, on the right, keeps you posted on what has changed on the account.

3 Benefit tiles and authorizations

- Each tile is one benefit the member is eligible for: Personal Care, Recovery at Home (two services: Recovery at Home and Post Discharge), Post-Discharge, or Companion Care. Members do not have all four.
- Select a tile to see its authorization: **Plan Allowance**, **Used**, **Pending**, and **Remaining** hours, plus the member's referrals for that benefit.
- **Pending** counts hours already reserved by open referrals on this authorization. It does not mean a referral hasn't been entered yet.
- Select between tiles to compare the authorization for each benefit.

KEY TAKEAWAY

Open the tile for the benefit you are working on before you add or review a referral. The authorization and the referral list are specific to that benefit.
