Finding Your Member

BCBS AR · Case Manager Reference

Search by ID (primary method)

1. Type the member's **ID** into the search bar and press Enter.
2. A dependent or other care recipient may appear on the eligibility file instead of the employee — use the **care recipient's own ID** when you have it.
3. Confirm you've opened the correct member before reviewing or creating a referral.

MEMBER IDENTIFICATION NOTE

The subscriber ID may combine contract and dependent information, but the member ID is the key lookup value. Don't assume the employee's identifier is the right one for the care recipient.

Advanced Search (fallback)

1. If the ID doesn't return a result, select **Advanced Search**.
2. Search by **First Name**, **Last Name**, and **Date of Birth**.
3. Confirm the member record before continuing — test values shown in training are examples only.

Reading the member landing page

SECTION	WHAT IT SHOWS
Overview	Full name, address, date of birth, phone, preferred language
Recent Activity	Latest authorization, referral, and note updates
Benefits	The member's benefit tiles — Post Discharge Support and Initial IHS Assessment. Select a tile to see its authorizations and referrals

NORMAL, NOT BROKEN

A member with no referrals listed simply hasn't had one created yet. Case managers add referrals when a service is needed — an empty list on its own isn't a problem.

Inside the benefit tiles

The **Post Discharge Support** tile covers both Post-Discharge and Virtual Companion services under one shared authorization. The 20 hours are the member's one allotment for the benefit year. Plan codes can vary member to member without changing the underlying benefit structure — don't assume a different code means a different benefit.

The **Initial IHS Assessment** tile is a separate one-point benefit with its own authorization. It doesn't use any of the member's post-discharge hours, and once the assessment is completed it shows Used 1.00 and Remaining 0.00 — that's expected.

IF A MEMBER SAYS “WALMART BENEFIT”

Some members know this program informally as their “Walmart benefit.” Recognize the reference, but use the approved formal program name in Benefits Hub and in any notes or tickets.
