Adding a Referral

Alignment · Case Manager Reference

BEFORE YOU START

Each member has an annual limit of cleanings set by their plan (1–21), and 1 point = 1 cleaning. Members can use Light Housecleaning, Standard Housecleaning, or a mix within that limit. Use the full allotment at checkout — all annual visits belong in one referral/order. Don't create one-off referrals.

Create the referral

1. From the member's benefit page, select **Add Referral**.
2. **Check the service address** shown for the member. If care happens somewhere other than their address on file, select **(change service address)** now, before you add anything to the cart. It applies to this referral only.
3. Search for and select the service: Standard Housecleaning - Copay or Light Housecleaning - Copay.
4. Confirm the service is Active.
5. Alignment has no Service Detail Questions (SDQs), so there is nothing extra to fill out.
6. Enter the Quantity — the member's full intended cleanings for this service.
7. Select **Add to Cart**.

USING BOTH SERVICES?

Add and review each service separately, then make sure the combined total matches the member's annual limit before you check out.

Worked example

SERVICE	QUANTITY	POINTS EACH	TOTAL POINTS
Standard Housecleaning - Copay	7	1.00	7.00
Light Housecleaning - Copay	3	1.00	3.00
Total	**10**		**10.00**

Review and submit

1. On the Referrals Summary screen, review each service's quantity and total.
2. Read the Service Address. It can't be edited here — if it's wrong, go back to the previous screen and use **(change service address)** before you check out.
3. Check that the combined total matches the member's full annual limit — no partial or one-off referrals.
4. Select **Checkout**, then **Confirm**.

VERIFY THE SERVICE ADDRESS BEFORE YOU CHECK OUT

Once a referral is submitted, its address can't be edited — fixing it takes a support ticket and a new referral. Change the address on the Add Referral screen, and double-check it every time.

GOOD TO KNOW

Providers can complete only one cleaning per day, so visits can't be stacked. Where a member's plan includes a copay, they pay $50 per cleaning directly to the provider — that isn't handled in Benefits Hub.
