Aetna Benefits at a Glance

Quick reference for the four Aetna benefits in Benefits Hub

Each tile on a member's page is one benefit. For these programs **1 point = 1 hour**, so Total Points shows hours.

Recovery at Home — 60 hours per qualifying diagnosis

Expires
30 days after submission. Moves to 30 days after the discharge date once it is recorded, never later than 12/31.

Limit
One referral per qualifying diagnosis, per member, per year.

- Asks for the **qualifying diagnosis** only. There is no chronic conditions question and no N/A.
- Recovery at Home hours apply first. The member's **Personal Care referral goes On Hold** and resumes when Recovery at Home ends.
- Record the discharge date under **Add > Discharge date**. This option is on Recovery at Home referrals only.

Post-Discharge — 12 hours per discharge

Expires
30 days after submission (day one is tomorrow).

Limit
A new referral for each new discharge.

- **Post-Discharge - No Conditions** follows the same steps.
- When hours left are fewer than one referral's worth, Benefits Hub asks **"Does this member need a new post-discharge referral?"** Yes, new discharge sends hours back to 12. Leftover hours do not add on top.
- **Readmission:** submitting the new referral closes the open one as **Eligibility Failed**. Its unused hours expire and do not go back to the member.
- Asks for **qualifying chronic conditions**: select all that apply, at least one required. There is no discharge date to record.

Personal Care — 40 or 80 hours per year, by plan

Expires
12/31, the end of the plan year. Hours do not roll over.

Limit
One referral per member per year, per plan.

- Support needs: select **at least two ADLs**. Benefits Hub will not let you continue with fewer. IADLs are optional.
- A second referral in the same year fails at checkout with an **Eligibility fail** message.

Companion Care — Up to 40 hours per calendar quarter

Expires
End of the quarter. Hours do not roll over to the next quarter.

Limit
One referral per member per calendar quarter.

- **Six facility questions**, all open text, all required.
- **SSBCI chronic condition(s)**: required, select at least one of seven.
- A second referral in the same quarter fails at checkout with an **Eligibility fail** message.

ON EVERY REFERRAL

Narrative is optional (250 characters) and can be edited later. **Verify the Service Address** before you check out. Change it on Add Referral, before you add to cart. It cannot be edited on the checkout screen or after checkout. THB contacts the member or point person to confirm interest before any provider outreach.
