

Signing In to Benefits Hub

Quick reference for accessing your account via SCAN's single sign-on

1 How access gets set up

SCAN sends your name and email to The Helper Bees, who creates your Benefits Hub account. SCAN then sends you the SSO sign-in URL directly. There's no separate emailed sign-in link or account setup step on our end.

2 Sign in through SCAN's SSO

Go to SCAN's SSO sign-in page and enter your usual SCAN credentials there.

<https://auth.myhomealign.com/Auth/Login/ha-prod-scan>

This is SCAN's actual SSO sign-in URL — not a placeholder.

3 No verification code needed

Because SCAN uses single sign-on, there's no separate emailed verification code to enter — SSO confirms your identity as part of signing in. Once that's done, you'll land on your home screen, ready to search for members and view benefits.

4 Trouble signing in?

- **Account not showing up or credentials not recognized?** Check with your SCAN supervisor or admin first to confirm your name and email were sent to The Helper Bees and your account has been created.
- **Account is set up but you still can't sign in?** Reach out to your organization's SSO or IT support — sign-in issues and password resets are handled outside Benefits Hub for SSO accounts.

Key takeaway

Unlike partners that use an emailed sign-in link, SCAN case managers sign in entirely through SSO. There's no verification code and no "Forgot password?" link on Benefits Hub itself — account and credential issues are handled through your SCAN supervisor or your organization's SSO/IT support.
