Understanding Benefits, Balances, Referrals, and Notes

Champion Health · Case Manager Reference

Status

Select the Status field on a referral to see what it means. **Accepted By Provider** means the provider has confirmed — and that's your green light to share their contact info with the member.

Provider

Select the provider's name for their contact card — Provider ID, company, email, phone, and location.

SHARING PROVIDER CONTACT INFO

The phone number is visible regardless of status — but only share it with the member once the referral reaches Accepted By Provider.

Referral narrative

Free-text space for context added to the referral — special instructions, background for the provider. It's normal for this to come back empty; check it anyway, since you won't know until you look.

Balance & key dates

Above the encounter list: Allowed, Used, and Remaining **hours** for this referral's authorization. Each completed encounter adds its hours to Used, and Remaining is Allowed minus Used. Hours expire on 12/31/2027 and don't roll over. Below that, Key Dates tracks the referral's history: received, assigned, accepted, and (if applicable) declined.

Encounters

An encounter is the provider's record of the visit — the date, the time in and out, the hours, and the service tasks the provider confirmed. Encounters only appear after a provider has actioned the referral, so a brand-new referral may not show one yet.

TASK CHECKLISTS VARY BY SERVICE

Open the encounter to see which Respite Care service tasks the provider completed and which they didn't.

Add a note

1. Select **Add**, then **Add Note**.
2. Choose a Note Type, then type what happened.
3. Select **Add Note** to save it.

NOTES DON'T ESCALATE ANYTHING

Adding a note does not alert The Helper Bees — it's just a record on the referral. If something needs attention, submit a ticket instead.

Find notes, documents, and service questions

VIEW	WHAT IT SHOWS
View Notes	Every note logged on the referral, in one table
View Documents	Any files a provider has attached (receipts, invoices)
View SDQ	The answers to any Service Questions entered when the referral was created. If a service asks none, its SDQ panel is empty.

The Respite Care allowance

Respite Care is a 48-hour annual benefit, shown as 48.00 points. It expires on 12/31/2027 and doesn't roll over.

REMAINING IS NOT ALWAYS THE FULL ALLOWANCE

Remaining = Plan Allowance − Used − Pending. Pending counts against the balance before care is finalized.
