Understanding Benefits, Balances, Referrals, and Notes

BCBS SC · Case Manager Reference

Status

Select the Status field on a referral to see what it means. Accepted By Provider means the provider has confirmed — and that's your green light to share their contact info with the member.

Provider

Select the provider's name for their contact card — Provider ID, company, name, email, phone, and location.

SHARING PROVIDER CONTACT INFO

The phone number is visible regardless of status — but only share it with the member once the referral reaches Accepted By Provider.

Referral narrative

Free-text space for context added to the referral — special instructions, background for the provider. It's normal for this to come back empty; check it anyway, since you won't know until you look.

Balance & key dates

Above the encounter list: Allowed, Used, and Remaining points for this referral's authorization — a different view than the benefit-level totals on the member's landing page. Each completed encounter adds its points to Used, and Remaining is Allowed minus Used. Points expire at the end of the year and don't roll over. Below that, Key Dates tracks the referral's history: received, assigned, accepted, and (if applicable) declined.

Encounters

An encounter is the provider's record of what actually happened. Encounters only appear after a provider has actioned the referral, so a brand-new referral may not show one yet.

TASK CHECKLISTS VARY BY SERVICE

Some services ask the provider to confirm specific Service Tasks on each encounter. Open the encounter to see what the provider submitted.

Add a note

1. Select Add, then Add Note.
2. Choose a Note Type (Visit Scheduled, Member Outreach, Status Change, General, and more).
3. Type what happened, then select Add Note to save it.

NOTES DON'T ESCALATE ANYTHING

Adding a note does not alert The Helper Bees — it's just a record on the referral. If something needs attention, submit a ticket instead.

Find notes, documents, and service questions

VIEW MENU OPTION	WHAT IT SHOWS
View Notes	Every note logged on the referral, in one table
View Documents	Any files a provider has attached (receipts, invoices)
View SDQ	The answers to any Service Questions entered when the referral was created. If a service asks none, its SDQ panel is empty.

The Digital Wallet allowance

The Digital Wallet is a $1,000 annual allowance, shown as 1000.00 points. It expires at the end of the year and doesn't roll over. Caregiver Support, Digital Health Literacy, and Virtual Companionship use the wallet and service-point workflow; In-Home Safety Assessments and home modifications use the plan and case-manager referral workflow.

REMAINING IS NOT ALWAYS THE FULL ALLOWANCE

Remaining = Plan Allowance − Used − Pending. Pending points count against the balance before care is finalized.
