

Finding Your Member

BCBS AR · Case Manager Reference

Search by EID (primary method)

- 1 Type the member's **EID** into the search bar and press Enter.
- 2 A dependent or other care recipient may appear on the eligibility file instead of the employee — use the **care recipient's own EID** when you have it.
- 3 Confirm you've opened the correct member before reviewing or creating a referral.

MEMBER IDENTIFICATION NOTE

The subscriber ID may combine contract and dependent information, but the member EID is the key lookup value. Don't assume the employee's identifier is the right one for the care recipient.

Advanced Search (fallback)

- 1 If the EID doesn't return a result, select **Advanced Search**.
- 2 Search by **First Name**, **Last Name**, and **Date of Birth**.
- 3 Confirm the member record before continuing — test values shown in training are examples only.

Reading the member landing page

SECTION	WHAT IT SHOWS
Overview	Full name, address, date of birth, phone, preferred language
Recent Activity	Latest authorization, referral, and note updates
Benefits	The member's Post Discharge Support tile — select it to see authorizations and referrals

NORMAL, NOT BROKEN

A member with no referrals listed simply hasn't had one created yet. Case managers add referrals when a service is needed — an empty list on its own isn't a problem.

Inside the benefit tile

The **Post Discharge Support** tile covers both Post-Discharge and Virtual Companion services under one shared authorization. Plan codes can vary member to member without changing the underlying benefit structure — don't assume a different code means a different benefit.

IF A MEMBER SAYS “WALMART BENEFIT”

Some members know this program informally as their “Walmart benefit.” Recognize the reference, but use the approved formal program name in Benefits Hub and in any notes or tickets.
