Simpra Case Manager FAQ

Simpra · Common questions from the field

Can I share the provider's phone number with a member?

Yes — once the referral reaches Accepted By Provider status. Before that point, the contact details may be visible in Benefits Hub, but they aren't ready to hand out yet.

How many visits does a member get?

It depends on their plan: 30 visits per year for ISNP, and 25 visits per year for DSNP and IESNP. Each visit is up to two hours. The Plan Allowance on the benefit tile shows the member's number. Visits don't roll over: the benefit expires at the end of the plan year.

Do I enter visits or hours?

Visits. Each visit is up to two hours, but the referral quantity is always the number of visits (1 point = 1 visit).

How many visits should I request on a referral?

Request all the visits the member plans to use up front. Providers accept a larger referral sooner than a few visits at a time, and the member doesn't have to use them all at once. The visits are shared between Companion Care and Virtual Companion, so if the member wants both services, split the visits between them and add each to the cart.

What's the difference between Companion Care and Virtual Companion?

Companion Care is non-medical, in-person companionship and may include emotional support, meal preparation, social activities, exercise, and appointment planning. Virtual Companion provides scheduled virtual social connection and emotional support. They draw on the same visits but are different services with different fulfillment workflows.

Who creates referrals — can The Helper Bees create one for me?

Referrals are entered by Simpra care managers and plan staff in Benefits Hub. The Helper Bees can walk you through the workflow and review referral details, but isn't authorized to create new referrals. New referral requests that reach THB are transferred to Simpra's Member Care Team.

Do I need to answer the Service Questions?

Yes — complete all of them, including the facility name (enter N/A if the member doesn't live in a facility), the facility contact, and the facility phone number when one applies.

How fast are referrals processed?

Authorizations are created automatically and referrals are assigned within two business days of submission.

How do I change the service address on a referral?

Before checkout: on the Add Referral screen, select (change service address) before you choose a service. It can't be edited at checkout, so if you spot a wrong address on the Referrals Summary, use the back arrow to return and change it. After checkout, fixing it takes a support ticket (not guaranteed) or a new referral.

The member says no provider has called. What now?

Provider outreach is expected within 3–5 business days after acceptance. If the member hasn't heard from a provider after 7–10 business days, they should call The Helper Bees. Confirm the member's phone number on their Overview is correct.

Where do I go for help with an exception?

Submit a support ticket from Benefits Hub (person icon, then Submit a ticket). Only escalate to your Account Coordinator if the situation is urgent.

Can THB change a member's address or other details?

No. Demographic and address corrections go through Simpra's eligibility file and standard plan correction process, not manual changes by THB. (The service address on a referral can be set when you create it.)

How is a member's eligibility decided?

Simpra determines eligibility and sends it to The Helper Bees in a daily eligibility file. THB validates the member against that file but doesn't decide plan eligibility.

Why do I see View SDQ?

View SDQ shows the Service Questions that were answered when the referral was created — preferred dates and times, and facility details.

Why does Source show eFax, Portal, Phone, or N/A on a referral?

Source shows how the referral came in. Any of those is expected — nothing is wrong with the referral.

Why don't I see an encounter on a brand-new referral?

Encounters only appear after the provider has actioned the referral. A referral with no encounters yet isn't necessarily a problem.

Do I need a separate escalation or grievance form?

No. Submit a request through Simpra's support form at thbsimpra-advantage.zendesk.com, choose the Issue Type that best fits, and include full details in Additional Comments.

What if a required ticket field doesn't apply?

Enter N/A rather than leaving it blank. An empty required field can stall the ticket.

I'm searching by ID and getting no results.

Double-check the ID you typed, then use Advanced Search with First Name, Last Name, and Date of Birth.
