Understanding Benefits, Balances, Referrals, and Notes

Longevity · Case Manager Reference

Status

Select the Status field on a referral to see what it means. **Accepted By Provider** means the provider has confirmed — and that's your green light to share their contact info with the member.

Provider

Select the provider's name for their contact card — Provider ID, company, name, email, phone, and location.

SHARING PROVIDER CONTACT INFO

The phone number is visible regardless of status — but only share it with the member once the referral reaches Accepted By Provider.

Referral narrative

Free-text space for context added to the referral. It's normal for this to come back empty; check it anyway, since you won't know until you look.

Balance & key dates

Above the encounter list: Allowed, Used, and Remaining for this referral — the units it covers, such as one pair of shoes or a number of Companion Care hours. Remaining is Allowed minus Used. This is a different view than the wallet totals on the member's authorization. Below that, Key Dates tracks the referral's history: received, assigned, accepted, and (if applicable) declined.

Encounters

An encounter is the provider's record of what actually happened. Encounters only appear after a provider has actioned the referral, so a brand-new referral may not show one yet.

TASK CHECKLISTS VARY BY SERVICE

Some services ask the provider to confirm specific Service Tasks on each encounter. For a product order these include the projected delivery date, tracking number, and payment type. Open the encounter to see what was submitted.

Add a note

1. Select Add, then Add Note.
2. Choose a Note Type (Visit Scheduled, Member Outreach, Status Change, General, and more).
3. Type what happened, then select Add Note to save it.

NOTES DON'T ESCALATE ANYTHING

Adding a note does not alert The Helper Bees — it's just a record on the referral. If something needs attention, submit a ticket instead.

Find notes, documents, and service questions

VIEW MENU OPTION	WHAT IT SHOWS
View Notes	Every note logged on the referral, in one table
View Documents	Any files attached to the referral (receipts, invoices)
View SDQ	The answers to any Service Questions entered when the referral was created. If a service asks none, its SDQ panel is empty.

The Life Enrichment and Companion wallet

Life Enrichment products and Companion Care share one wallet of **$500 per quarter** (up to $2,000 a year), shown as 500.00 points. It is use-it-or-lose-it at the end of each quarter, so a new referral is needed each quarter. Companion Care is entered in hours. OTC is a separate wallet that members order by phone, not through Benefits Hub.

REMAINING IS NOT ALWAYS THE FULL ALLOWANCE

Remaining = Plan Allowance − Used − Pending. Pending points count against the balance before care is finalized.
